Data Classification Definitions Matrix

Classification level	Definition/Rule	Impact if Leaked
Confidential	Highly sensitive internal data restricted to authorized staff. Protected under legal frameworks.	Severe operational, legal, and financial damage (e.g., identity theft, POPIA/GDPR lawsuits).
Public	Information intentionally released for the general public, students, and visitors to read freely.	Zero risk. This data is designed for the public domain.

Institutional Risk Register Log (ISO 27001 Clause 6.1.2)

Asset ID	Threat Scenario	Likelihood (1-3)	Impact (1-3)	Total Risk Score (LxI)	Mitigation Control
AST-02	A lecturer leaves their personal laptop logged into Moodle in a public space, allowing an unauthorized user to access and download unreleased exam papers.	2 (Medium. Staff may get distracted or have to tend to an emergency, forgetting their laptop).	3 (High. Leads to grade compromise and damaged reputation of the university as well as the staff)	6 = High	Enforce all staff use a secondary security code to login and set up a 10-minute automatic screen lockout policy for devices not being used
AST-04	A scammer hacks the finance system and changes the banking details on tuition fee invoices, causing parents to pay student fees into a fraudulent bank account.	2 (Medium. Invoice scams happen occasionally to universities and colleges via digital loopholes).	3 (High. Leads to massive financial losses for families and ruins the university's reputation).	6 = High	Require a second staff member to digitally verify and sign off on any changes made to the university's outgoing billing templates or banking profiles
AST-05	An HR employee clicks a fake link in a malicious email, allowing hackers to steal their login password and download confidential staff employment contracts and medical aid information.	3 (High. Fake "phishing" emails are a very common type of cyber attack in the education sector).	3 (High. Leaking employee contracts and medical details results in severe legal fines under GDPR/POPIA).	9 = Critical	Run monthly safety training for all staff on how to spot fake emails, and block staff from opening attachments from unverified external senders
